You should have received all of the lab reports already as part of the monthly reports. I have attached the report for the January sediment samples to this e-mail. All of the data has been validated. We are working on one composite database for all of the validated soil data (McLaren/Hart, Feezor Phase 1C, Phase 1D and Additional Characterization). We are still finding a few minor issues with it as the various parties (Auxier, SSPA, FEI and EMSI) start to use it. As soon as I know it is all good I will share it with the clients with a request to share it with you.

Paul when can EPA expect to receive the validated data from the sediment and other field sampling for this effort? Especially the sediment results.
